Data Engineer with 3+ years of experience building analytics and data platforms using `Python`, `SQL`, `PostgreSQL`, `BigQuery`, `Airflow`, `AWS Glue`, `dbt`, and `Power BI`. Delivered end-to-end pipelines, automated reporting workflows, and executive-ready insights for HR, manufacturing, and financial operations.

Work experience

VNG Corporation - Data Engineer

Nov 2025- Now (6m)

Technical Core: `Python`, `PostgreSQL`, `AWS Glue`, `Airflow`, `Hasura`.

Key Projects & Impact:

Data Migration: Engineered an Odoo-to-ATS migration pipeline; implemented data reconciliation layers to eliminate data mismatches and ensure zero loss during the product launch.

Cloud Automation: Programmed `Python` / `Boto3` scripts to fully automate `AWS Glue` operations, eliminating manual intervention and optimizing compute resource allocation.

DB Engineering: Managed `PostgreSQL` / `Hasura` ecosystems; built automated monthly partitioning frameworks, custom functions, and cron jobs to sustain query performance under scaling data volumes.

GenAI & Semantic Modeling: R&D'd and integrated `Malloy` into the `IPay` system, deploying a `Text-to-Malloy` feature that enables accurate natural language data querying by defining explicit semantic layers.

Operations & Docs: Standardized system architecture documentation; partnered with operations to deploy monitoring and alerting workflows, ensuring high pipeline availability.

LEGO Manufacturing Vietnam - Data Analyst

Nov 2024 - Nov 2025 (1yr)

- Developed comprehensive reporting solutions for the PPC department, covering headcount and workforce planning, turnover by category, D&I KPIs, L&D, overtime, absenteeism, and retention policy analysis to support strategic decision-making.
- Built PPC reporting across headcount/workforce planning, turnover, D&I, L&D, overtime, absenteeism, and retention to support strategic decisions.
- Produced monthly executive summaries from `Power BI` dashboards for senior leadership.

- Partnered with BI Manufacturing on Factory Huddle and Visual Factory reports used in daily operations and leadership meetings.
- Delivered an end-to-end reporting solution for LEGO Vietnam's 3-month Active Summer program via `Google Forms API` + `Python` + `Power BI`.
- Supported development of a `Power App` for gym consent and reservations, improving process efficiency and user experience.

ITL Corporation

HR Data Analyst

Aug 2023 - Nov 2024 (1yr 3m)

- Analyzing & crafting reports from data of HRMS Database:
 - Develop a full data pipeline from Database -> Data Warehouse -> Reporting (using `MSSQL`, `PostgreSQL`)

- Streamline data using `SQL` & `Python`.
 - Visualize & create report on `Power BI`.

- Scraping jobs from job-listing-sites using `BeautifulSoup`, `Selenium`, `Pandas` to report about the recruiting market.
- Conducting internal survey to measure HR metrics: stress level, employee satisfaction, employees attachments,...
- Teaming up with IT to build an Internal AI Assistant using `OpenAI API` & `Langchain`

Human Resources Management Trainee

Feb 2022 - Aug 2023 (1yr 7m)

- Doing monthly salary add-on calculation for the container fleet monthly.
- Support answering question related to company policies
- Processing paper-work for employees: Union, Resignation,...
- Planning employee cost for 2024

Skills

 **More information:** [📁 Projects](#)

Learning Agility & AI-Accelerated Development

- Fast learner with strong fundamentals; quickly adopts new tools/languages and applies them in production.
- Recently adopted `Malloy` and `DuckDB` using AI-assisted workflows (`Cursor` / `VS Code`) to accelerate delivery.

Python

- Advanced `Python` for end-to-end analytics and data engineering: ingestion, transformation, and reporting automation.
- Delivered production-grade `Python` pipelines with API integration, scraping, scheduling, data quality checks, and reusable components.
- Proficient with `pandas`, `matplotlib`, `seaborn`, `plotly`, `Selenium`, `BeautifulSoup`, and orchestration-based workflows.

SQL

- Advanced `SQL` for analytics: complex joins, aggregations, recursive logic, and query optimization (`PostgreSQL`, `BigQuery`, `MSSQL`).
- Built and maintained reporting-ready models/datasets for executive and operational decisions.

Data Engineering & Analytics Delivery

- Built and operated pipelines for HR, business, and financial analytics.

- Hands-on with `Airflow`, `dbt`, `AWS Glue`, `BigQuery`, and `pg_cron` for orchestration, transformation, and scheduled maintenance.
- Delivered analytics products end-to-end: data collection, modeling, dashboards, and stakeholder-facing insights.

BI & Business Applications

- Advanced `Power BI`: data modeling, `DAX`, dashboard design, and executive storytelling.
- Hands-on `Power Platform` (`Power Apps`) for internal process solutions.

MS Office

- Full professional proficiency across MS Office.
- Advanced `Excel` and `PowerPoint`.

Soft Skills

Languages

- Vietnamese: Native or bilingual proficiency
- English: Full professional proficiency (IELTS 7.0)

Education

Bachelor Degree

- Human Resources Management - University of Economics Ho Chi Minh City (*Sep 2018 - Dec 2021*)

Highlighted Projects

More details on my project, visit [Projects](#)

1. Building an Internal AI Assistant

Sep 2023 - Present

Built an internal assistant for policy and knowledge lookup to help employees retrieve company information in natural language.

[GitHub](#)

Tech stack: `OpenAI API`, `Langchain`, `Pinecone`, `PyDocX`, `Python`

2. Labor Market Analysis from Job Listing Sites

Aug 2023 - Present

Automated job posting collection and analysis to track hiring trends in Vietnam's data job market. [GitHub](#) | [Publication](#)

Tech stack: `Python`, `Selenium`, `BeautifulSoup`, `Pandas`, `Matplotlib`

3. Employee Mental Health & Stress Survey Analytics

Aug 2023 - Sep 2023

Analyzed employee and manager survey data to compare stress and mental health perceptions across cohorts. [Project Link](#)

Tech stack: `Pandas`, `Matplotlib`, `Google Forms`, `Python`
