A 3+ years of experience Data Analyst skilled in Python, SQL, Power BI, Power Platform and Excel, with experience building HR and workforce analytics solutions at scale. I have designed reporting systems, automated data workflows, and delivered executive-level insights that support daily operations and strategic decision-making. My work emphasizes turning complex data into actionable insights that contribute directly to business performance.

Work experience

VNG Corporation - Data Engineer

Nov 2025- Now (0.5 yr)

Technical Core: Python, PostgreSQL, AWS Glue, Airflow, BigQuery, dbt.

Key Projects & Impact:

- **Financial Data Infrastructure & Aggregation:**
 - Designed and implemented complex recursive SQL logic to aggregate financial performance data across organizational hierarchies.
 - Unified scheduled and actual transaction data to provide accurate, real-time insights into fiscal health.
- **Pipeline Orchestration & Automation:**
 - Architected and managed robust data pipelines using **Apache Airflow**, ensuring high availability and reliability of data flows.
 - Optimized database maintenance and task scheduling by implementing and troubleshooting **pg_cron** for materialized view refreshes and table partitioning.
- **Scalable Data Modeling:**
 - Developed an end-to-end data ingestion framework to scrape and process large-scale logistics and real estate data.
 - Engineered a multi-layered architecture in **BigQuery**, moving data from raw "bronze" layers to analytics-ready models using **dbt**.
- **Process Innovation:**
 - Pioneered the use of semantic modeling tools like **Malloy** and **DuckDB** to accelerate analytical workflows and bridge the gap between raw data and business intelligence.
 - Integrated AI-native development environments (Cursor/VS Code) and agentic workflows to automate technical documentation and code generation, increasing team velocity.

LEGO Manufacturing Vietnam - Data Analyst

Nov 2024 - Nov 2025 (1 yr)

- Developed comprehensive reporting solutions for the PPC department, covering headcount and workforce planning, turnover by category, diversity & inclusion KPIs, learning & development, overtime, absenteeism, and retention policy analysis to support strategic decision-making.
- Prepared monthly executive summaries and presentations for senior leadership, distilling insights from Power BI dashboards into clear, actionable reports
- Collaborated with the BI Manufacturing team on initiatives such as Factory Huddle and Visual Factory, delivering reporting solutions used in daily operations and leadership team meetings.
- Designed an end-to-end reporting solution for LEGO Vietnam's 3-month Active Summer program by integrating Google Forms data via API into Python workflows, analyzing participation metrics, and delivering insights through a Power BI dashboard.
- Supported the development of a Power App for gym room access consent forms and reservations, improving process efficiency and user experience.

ITL Corporation

HR Data Analyst

Aug 2023 - Nov 2024 (1 yr 3 mo)

- Analyzing & crafting reports from data of HRMS Database:
 - Develop a full data pipeline from Database -> Data Warehouse -> Reporting (using MSSQL, PostgreSQL)
 - Streamline data using SQL & Python.
 - Visualize & create report on PowerBI.
- Scraping jobs from job-listing-sites using BeautifulSoup, Selenium, Pandas to report about the recruiting market.
- Conducting internal survey to measure HR metrics: stress level, employee satisfaction, employees attachments,...
- Teaming up with IT to build an Internal AI Assistant using OpenAI API & Langchain

💡 **More information:** [📁🔗 Projects](#)

Human Resources Management Trainee

Feb 2022 - Aug 2023 (1 yr 7 mo)

- Doing monthly salary add-on calculation for the container fleet monthly.
- Support answering question related to company policies
- Processing paper-work for employees: Union, Resignation,...
- Planning employee cost for 2024

Skills

Python

- Full proficient in key data science libraries: `pandas`, `matplotlib`, and `seaborn`, `plotly`, ...
- Proficient in web scraping using tools such as `Selenium` and `BeautifulSoup`.
- `Langchain`, `Pinecone`, `PyDocX`: Being able to create & run an informational pipe line for prompt-tuning LLMs like GPT to become a personal assistant.

SQL

- Proficient in basic SQL: being able to retrieve data from database, doing some GROUPBY for data summarization, JOIN tables,...

MS Office

- Full professional proficiency in all applications of MS Office
 - Especially Excel & PowerPoint (Advanced level)
-

Soft Skills

Languages

- Vietnamese: Native or bilingual proficiency
 - English: Full professional proficiency (IELTS 7.0)
-

Education

Bachelor Degree

- Human Resources Management - University of Economics Ho Chi Minh City (*Sep 2018 - Dec 2021*)
-

Projects

1. Building an internal AI Assistant

Sep 2023 - Present

[GitHub: Internal AI Assistant](#)

The project aims to leverage the natural language processing capabilities of Large Language Models (LLM) by providing them with additional information about the specific domains we want to exploit.

In this case, the project is specifically focused on building a Company Internal AI Assistant that possesses the ability to answer questions about the company's policies and business knowledge. The Assistant would be able to help employees easily research internal textual information using natural language.

- **Skills:** pandas • langchain • Natural Language Processing (NLP) • Prompt Engineering • huggingface • Python (Programming Language)

2. Labor Market Analysis (Data Collected from Job-Listing-Sites)

Aug 2023 - Present

[GitHub: Job Market Analysis](#)

In this project, I've used 2 Python libraries: Selenium & BeautifulSoup to surf the web & collect data from job-listing-sites (I've succeed with CareerBuilder & will continue with others like Vietnamworks, Indeed, Google Jobs,...).

- **Skills:** pandas • Selenium • Beautiful Soup • Python (Programming Language)
- **Publications:**
 1. [Bảo cáo tuyển dụng Data 11/2023 - Substack](#)
 2. [Chia sẻ lại trên cộng đồng DS/ML Vietnam - Facebook](#)
 3. [Chia sẻ lại trên Vietnam Data Analyst Forum - Facebook](#)

3. Survey about Mental Health & Stress status of ITL Employees

Aug 2023 - Sep 2023

[ITL Mental Health & Stress Survey](#)

The survey was conducted for measuring the status of Mental Health and Stress of ITL employees in August 2023. The survey was conducted on both employees and managers using two different versions:

1. Version for JG5 and below: Employees rating their status.
2. Version for JG6 and above: Managers evaluate the status of their employees.

The data collected from this 2 versions were used to compare with each other to see the differences between employees' status & the evaluation of managers.

- **Skills:** pandas • Matplotlib • Google Forms • Python (Programming Language)
-
