

Kiem Pham

****Data Engineer - VNG Corporation****

 phamkiem.ns@gmail.com

 0941840068

 Ho Chi Minh City

 dataspi.github.io/DataSpi

Data Engineer with 3+ years of experience designing, building, and operating data platforms for analytics. Strong in `Python`, `SQL`, `PostgreSQL`, `BigQuery`, `Airflow`, `AWS Glue`, and `dbt`, with hands-on delivery of stable ETL/ELT pipelines, data modeling, and operational monitoring. Proven ability to collaborate with BI, analysts, and business stakeholders to deliver trusted, actionable data products.

Work experience

VNG Corporation - Data Engineer

Nov 2025- Now (6m)

Technical Core: `Python`, `PostgreSQL`, `AWS Glue`, `Airflow`, `Hasura`.

Key Projects & Impact:

- Data Platform & Migration: Designed and operated an `Odoo-to-ATS` data migration pipeline with reconciliation controls to maintain data integrity and prevent data loss at go-live.
- ETL/ELT Automation: Developed `Python` + `Boto3` automation for `AWS Glue` jobs, reducing manual operations and improving pipeline stability and run-time consistency.
- Managed `PostgreSQL` / `Hasura` workloads, including automated monthly partitioning, custom SQL functions, and scheduled maintenance (`pg_cron`) to keep query latency stable as data volume grew.
- Data Modeling & Consumption: Integrated `Malloy` semantic modeling into the `IPay` environment to improve self-service analytics and natural language querying accuracy.
- Monitoring & Documentation: Established technical documentation standards and implemented monitoring/alerting flows with operations teams to improve reliability and incident response.

LEGO Manufacturing Vietnam - Data Analyst

Nov 2024 - Nov 2025 (1yr)

- Designed and delivered 3 targeted reporting solutions for the PPC department, covering: headcount & workforce planning, turnover, D&I, L&D, overtime, absenteeism, retention policy analysis to support strategic decision-making.
- Produced monthly executive summaries from `Power BI` dashboards for senior leadership.
- Partnered with BI Manufacturing on Factory Huddle and Visual Factory reports used in daily operations and leadership meetings.
- Delivered an end-to-end data flow for LEGO Vietnam's 3-month Active Summer program using `Google Forms API` + `Python` + `Power BI`.
- Supported development of a `Power App` solution for gym consent and reservations, enhancing process efficiency and user experience.

ITL Corporation

HR Data Analyst

Aug 2023 - Nov 2024 (1yr 3m)

- Conducted comprehensive analyses and generated detailed reports using data from the HRMS database.
- Developed a comprehensive data pipeline spanning database, data warehouse, and reporting phases using `MSSQL` and `PostgreSQL`.
- Streamlined data using `SQL` and `Python`.
- Visualized and created reports using `Power BI`.
- Collected and analyzed job listings from job-listing sites using `BeautifulSoup`, `Selenium`, and `Pandas` to generate comprehensive reports on the recruiting market.
- Led comprehensive internal surveys to assess key HR metrics, including stress levels, employee satisfaction, and employee engagement.
- Collaborated with IT to develop an internal AI assistant leveraging the `OpenAI API` and `Langchain`.

Human Resources Management Trainee

Feb 2022 - Aug 2023 (1yr 7m)

- Calculated monthly salary add-ons for the container fleet to ensure accurate and timely compensation adjustments.
- Provide support by answering questions related to company policies.
- Processed employee paperwork related to union matters and resignations.
- Planned employee costs for 2024.

Skills

 **More information:** [📁 Projects](#)

Technical Skills

Analytics Engineering

- Dimensional Modeling (Star Schema), Data Warehouse & Data Marts
- ETL/ELT Pipelines, Semantic Modeling (`Malloy`), Data Quality

Data & Programming

- Advanced `SQL` (`PostgreSQL`, `BigQuery`, `MSSQL`)
- `Python` (`pandas`, `BeautifulSoup`, `Selenium`, `matplotlib`, `plotly`)

Data Platform

- `PostgreSQL`, `BigQuery`, `dbt`, `AWS Glue`, `Airflow`, `pg_cron`, `Git`, `Hasura`

Business Analytics

- `Power BI`, `DAX`, KPI Development, Executive Reporting, Self-service Analytics

Collaboration

- Cross-functional stakeholder collaboration, technical documentation, AI-assisted development (`Cursor`, `VS Code`)

Soft Skills

Languages

- Vietnamese: Native or bilingual proficiency
 - English: Full professional proficiency (IELTS 7.0)
-

Education

Bachelor Degree

- Human Resources Management - University of Economics HCMC - (Sep 2018 - Dec 2021)
-

Highlighted Projects

More details on my project, visit [Projects](#)

1. Real Estate Analytics Platform

Sep 2025 – Present

Built an end-to-end data pipeline to collect, model, and analyze Vietnam's real estate market, with automated reporting and interactive dashboards.

Tech stack: `Python`, `Supabase`, `Malloy`, `DuckDB`, `Selenium`, `BeautifulSoup`, `Google Looker Studio` [GitHub](#)

2. Building an Internal AI Assistant

Sep 2023 - Present

Built an internal assistant for policy and knowledge lookup to help employees retrieve company information in natural language. [GitHub](#)

Tech stack: `OpenAI API`, `Langchain`, `Pinecone`, `PyDocX`, `Python`

3. Labor Market Analysis from Job Listing Sites

Aug 2023 - Present

Automated job posting collection and analysis to track hiring trends in Vietnam's data job market. [GitHub](#) | [Publication](#)

Tech stack: `Python`, `Selenium`, `BeautifulSoup`, `Pandas`, `Matplotlib`

4. Employee Mental Health & Stress Survey Analytics

Aug 2023 - Sep 2023

Analyzed employee and manager survey data to compare stress and mental health perceptions across cohorts. [Project Link](#)

Tech stack: `Pandas`, `Matplotlib`, `Google Forms`, `Python`
